EXPERIENCE

Senior Software Engineering Intern

August 2024 – Present

Digital Nest

Gilroy, CA

- Managed multiple teams and oversaw up to five projects simultaneously while ensuring deadlines were met.
- Assisted clients migrating their websites between hosting providers, ensuring a smooth and efficient transition.
- Collaborated with clients to understand their needs, created documentation, and developed video tutorials.
- Development of a high-end client website, fostering connections that resulted in additional job opportunities.

Software Engineering Intern

July 2023 – August 2024

Digital Nest

Salinas, CA

- Assumed leadership of a project upon the departure of the lead, orchestrating team efforts to accomplish diverse tasks including site styling, form creation for ticket purchases, and carousel implementation.
- Leveraged ACF/ CPTUI to build flexible, client-specific features improving site usability and satisfaction.
- Set up and customized WooCommerce for WordPress site as well as integration of Paypal for donations.
- Collaborated with a team to develop custom plugins leveraging Stripe APIs for donation processing.

PROJECTS

Eye Tracker Software | PHP, JavaScript, AWS

April 2025

- Collaborated with a team of 6 to integrate eye-tracking functionality into a web platform for research and marketing insights.
- Implemented APIs to capture and store gaze coordinates in a database and upload synchronized video recordings of user hotspots to AWS S3 for analysis and reporting.

Central Coast Comedy Club | PHP, CSS, JavaScript, WordPress

January 2025

- Collaborated with a team of 2 to meet a tight deadline implementing custom functionalities to enhance the site.
- Acted as a bridge between designers and developers, ensuring timely delivery of project needs.
- Integrated event scheduling and ticketing features, streamlining the process for users to view upcoming shows and purchase tickets.

BizzNest Flow | React.js, Node.js, MySQL

December 2024

- Designed and implemented an interactive dashboard to track intern performance and feedback, leading to a 30% improvement in skill assessments and overall engagement scores.
- Built a robust backend system with Node.js and MySQL to securely manage data from user submissions.
- Collaborated with cross-functional teams to ensure seamless integration of user feedback tools, resulting in a 20% boost in the effectiveness of mentorship programs.

Pair Randomizer Project | HTML, CSS, JavaScript

September 2024

- Enhanced team assignment efficiency by 40% by developing a JavaScript-based randomizer to create dynamic groups for events or activities.
- Integrated web-based interface providing an intuitive user experience, increasing engagement by 20%.
- Applied responsive design principles to enhance functionality and user experience across various devices.

Occord | PHP, CSS, WordPress

June 2024

- Guided site modifications, resulting in over a 60% reduction in external intervention time.
- Conducted regular meetings with OCCORD's Communication Coordinator to address inquiries and facilitate necessary adjustments before the website launch.
